```
1  ManageIQ Python API Client
2  =====
3
4  This python package provides the ManageIQ API Client library.
5
6
7  Getting Started
8  -----
9
10 Preparing your python virtual environment::
11
12     $ virtualenv venv
13     $ source venv/bin/activate
14     $ pip install -e . # To create an editable install of this package
15
16 If you want to install it directly from GitHub::
17
18     $ pip install git+https://github.com/ManageIQ/manageiq-api-client-python.git
19
20 To run the example present in this repository you probably need to configure
21 your options (if different from the default shown here)::
22
23     $ export MIQURL=http://localhost:3000/api
24     $ export MIQUSERNAME=admin
25     $ export MIQPASSWORD=smartvm
26
27     $ python example.py
28
29 To run the example with an API Token use these settings::
30
31     $ export MIQURL=http://localhost:3000/api
32     $ export MIQTOKEN=< place real token here >
33
34     $ python example.py
35
